

NR GRAFTECH INDIA

**MANUFACTURER OF
OFFSET PRINTING & AUTOMOBILE
CHEMICALS**

OUR PROFILE

NR GRAFTECH INDIA providing high standard products for all kind of Offset printing, Automobiles chemicals & Cleaning chemicals since 2016.

We are redefining the standards of cleanliness in India. Every user of **NR GRAFTECH INDIA** can take pride in the fact that our products and manufacturing have minimal impact on the environment. We provide customized topmost quality, eco-friendly products for printing & automotive industries. We are associated with many large corporations. Our products have proven our ability to provide quality material within assured delivery times.

NR GRAFTECH INDIA is accessibly located in Faridabad, Haryana. Our history has formed constant and stable base for our future evolution & development as we progress.

Our strong team and enthusiastic management is dedicated to provide better quality product for domestic and commercial segment in the market and its customers with the finest products. We assure that our products demonstrate superior performance for use in multiple applications.

Our invention and demand of our products in market exhibits an excellent effect & providing high quality solution to all types of operation is at our heart of what we do. To keep the work place safe, unpolluted and by-product clean we have the right product for the job.

PRODUCT SORT

- Anti Spatter
- Benzolift
- Clean N Shine
- Denzo Clean
- DRC 1000
- Dry Fount Powder
- Econol
- Fount Prima X ALK
- Fount Super U
- Image Booster
- Instant Shine
- Liquid Reducer
- Multi Clean
- Rust X Clean
- RPW4000
- Screen Reducer
- Tack Reducer
- Wash 100
- Wash Additives

PRODUCT DESCRIPTION

CLEANING PRODUCTS

CLEAN N SHINE is a silicone oil based emulsion containing non ionic surfactants. This emulsion acts as a barrier and forms a thin film between the compound and the mold surface. This emulsion is mainly used as a mold release agent in foundries, also has wider application in the rubber and plastic industries. It is one of the components elements in making of polishes and cleansers for artificial leather, fabrics, furniture polishes and plastic parts.

Instant Shine is one step solution for maximum durability of shines on number of surfaces like vinyl, leather, rubber & plastics items. It gives protection from UV rays, fadeness or cracking & also reduces dirt attraction.

PRINTING PRODUCTS

Econol is used as a fount additives in alcohol dampening system. It reduces the surface tension of water & provide uniform water layer on plate to give uniform depth of ink & improves the shine of printing.

FOUNT PRIMA X ALK is highly buffered fount for alcohol dampening machines. It contains anti corrosive agents, water softeners, gumming agents and surfactants to give universal application of water on plate. It reduces start up wastage & gives enhanced prints.

FOUNT SUPER U is a strongly buffered fountain concentrated solution for sheet fed printing machines. It also contains anti corrosive agents, water softeners & surfactants to reduce start up wastage & ensures consistent print quality with proper ink/water balance.

DRY FOUNT POWDER is an excellent or economical & easy carrying for sheet fed printing machines. Its gives proper buffer with anti corrosive, water softener & gumming agent to ensures consistent print quality with proper ink/water balance. Dissolve this packet into 5 Ltr. Of normal tap water. It should used when the whole material is dissolved.

DRC 1000 is an excellent product for removal of ink build-up on dampening pan rollers or metering rollers. Especially in alcohol printing there is an increased build up of inks on dampening rollers so it helps to remove inks faster & keeps rollers instant dry & clean.

DENZO CLEAN is a thick emulsion for deep cleaning of inks from baked plates. It's a water miscible plate cleaner for fastest removal of inks/dried ink without damaging any impression on plates.

MULTI CLEAN is a plate cleaner with excellent cleaning capacity of inks from PS plate. It removes inks/dried inks without damaging any impression on plates. It can also be used as a scum remover while printing.

WASH 100 is a highly effective general purpose water miscible blanket/roller wash. It has low aromatic high flash point & improves the life of rubber blankets & rollers. It is safe for hands & dries properly without damaging the rubber surface or removes inks faster from blankets/rollers.

WASH ADDITIVES is an effective emulsifier which makes MTO/Diesel/Kerosines a water miscible wash by adding 1% of WASH ADDITIVES. It improves the life of rubber blankets or rollers without damaging & safe for hands.

TACK REDUCER is used on low grammage or coated paper which creates an anti tacking properties in printing ink which helps to avoid paper sticking on blanket while printing. It improves the shine of inks without fading the colour & doesn't leaves back impressions.

LIQUID REDUCER is an excellent ink oil for softing or diluting the viscosity of inks especially for ground work on paper or board. It improves the shine of inks without fading the colour & doesn't leaves back impressions.

IMAGE BOOSTER is highly suitable to reduces the cost of positives & gives sharp or enhanced printout for processing text work of laser printouts. It helps to improve the darkness of light density pin hole & levels the uneven spread of toner on paper.

BENZOLIFT is used for removing permeated ink from blanket due to regular usage. It can also used when a blanket is punched due to over feeding of paper.

SCREEN REDUCER is used to reduces the viscosity or thickness of screen printing ink without fading the ink's color. It is used to extend ink & makes the print softer to touch.

AUTOMOTIVE PRODUCTS

RUST X CLEAN is used in automobile industry for removing of rust. It dissolves rust and restores tools, equipment & surface to bare metal without chipping, scraping or scrubbing.

RPW 4000 is a water soluble rust preventive additive & non hazardous. It applies on metal surface by dipping or spraying. This rust inhibitors provide rust prevention that protect against corrosion & gives brightness to the metals.

ANTI SPATTER is a water based release agent that acts as a shield & prevents weld spatter from sticking to the metal surface. It is compatible with the metallic & non metallic surface. It contains metal corrosion inhibitors, wetting agents & special anti-adhesion materials that helps to make welding neater & makes cleanup easier.

We have a policy for using the most effective, safe and environmentally acceptable products throughout our invention range. We offer paramount cleaning solution and design the product to meet the exacting standard of the usage of the consumer. Our products are safe both for skin and surface. All the need of cleaning has solution in our product. We are proud to say that we have offered supreme satisfaction to our customers till date and will continue to do so in the future.

You raise your demand; we are here to fulfil it.

PRODUCTS WITH PERFECTION FOR CUSTOMER'S SATISFACTION
